

DMX - An Essential Part of Your Practice or Firm

DETECTING JOINT INSTABILITY

Joint instability can be difficult to detect and evaluate, yet it can create unexplained, complex, and often random symptoms for your patients/clients.

DMX is the gold standard for evaluating joint instability.

FINDING PERMANENT INJURY

Ligament damage is a permanent loss of motion integrity and is an injury if over **3mm** in translation.

Permanent injuries lead to better insurance settlements!

PATIENT COMPLIANCE

When patients can “see” their condition, and understand how the recommended treatment can improve it, they are more likely to follow through with their care plan.

When to Order or Recommend a DMX

If you suspect a patient or client has instability, especially in the upper cervical, then you should order or recommend a DMX. Possibility of instability = DMX!

The optimal time to order a DMX is soon after the patient is out of the acute stage. Significant inflammation and protected movements can limit the ability to evaluate instability.

Other reasons to order a DMX include:

- Your client was recently in an auto accident
- A patient with a previous head injury or neck trauma
- Symptomatic patient who has had previous negative imaging
- A patient with unexplainable headaches, especially with movement
- Those suffering with Dizziness, blurred vision, pain with movement, difficulty swallowing, and TMJ

What to Expect After Referral

- 1) We receive the referral/ order from the doctor
- 2) We reach out to schedule directly with the patient
- 3) DMX imaging is performed and reviewed with the patient
- 4) Our reading doctor creates a detailed mensuration report tailored to the patient
- 5) Report and video sent to the patient, doctors, and attorneys for treatments and/or in legal proceedings
- 6) Continued professional support through complementary DMX usage lunch, expert witnesses, or professional opinions

Discount Options for Cash Pay, Travel, & Group

Time of Service/ Cash Pay

Let's face it, insurance billing, liens, bounced checks, and account management issues consume a lot of time and energy.

We offer a \$250.00 discount for being paid in full, at the time of service.

Travel

Many patients we see travel a significant distance to receive our DMX. We offer a \$50.00 discount to help with your travel costs.

The discount is available for those who travel more than 50 miles to see us.

Clinic/Group

Our group discount of \$150 is a way for your client/patient to save on costs when we receive multiple patients from you.

Your clinic/firm qualifies when we receive 3+ referrals a month.

Insurance Coverage

Due to Digital Motion X-ray being a specialized medical imaging, and with more insurance providers covering less than our service fees, our facility does not bill insurance.

In situations other than personal injury/ auto accident cases, the patient pays out of pocket. However, we encourage patients to seek reimbursement from their insurance providers. Patients may be eligible for a partial reimbursement by submitting a claim to their healthcare provider!

Better Reimbursement Through Personal Claims

We've discovered patients often receive higher reimbursements from their health insurance providers when they submit their DMX claim directly to their insurance.

Patients have found success with various health insurance carriers, including health-sharing companies like Christian Health Care Ministries. Additionally, traditional insurance providers such as Blue Cross Blue Shield, Aetna, Cigna, United Healthcare, and state insurance programs have yielded positive outcomes. In fact, Devoted Health fully reimbursed one of our patients.

How Much Insurance Covers

Some health insurance companies only reimburse a few hundred while others cover the entire amount. We encourage patients to contact their insurance provider and request how much they would cover.

Rest assured, we provide all necessary statements and information to help facilitate their reimbursement.

Personal Injury Liens

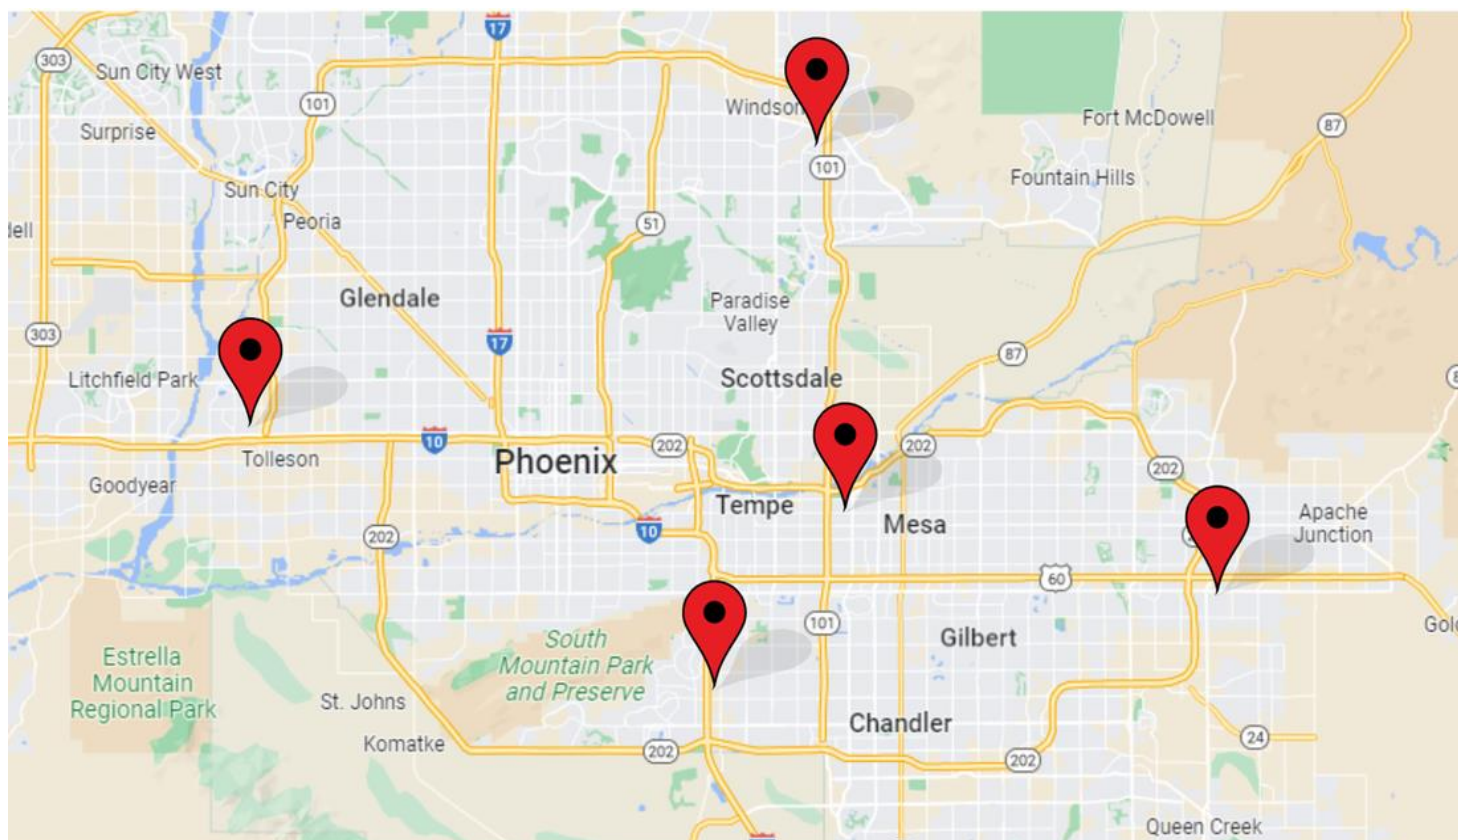

At Arizona Digital Motion X-ray, we hold medical liens and work with several personal injury law firms across the valley.

This ensures patients receive the care they need without worrying about immediate payment. Our commitment to facilitating smooth and hassle-free medical processes underscores our dedication to patient care and legal support.

AZ|DMX Locations

Scheduling: 855-369-7291 | FAX: 855-369-7291

Valley Locations

North Valley Location	East Valley Location	Central Valley Location	South Valley Location	West Valley Location
NE Corner of Loop 101	U.S. 60 & Loop 202	Loop 101 & Loop 202	U.S.10 & Loop 202	U.S.10 & Loop 101

Location Addresses

Due to being a mobile lab, we do not have specific addresses for our locations. However, we give a pinned map link to patients. We use convenient contracted shopping centers to park our mobile van.

If you believe your office has enough parking spaces for our lab, then we are more than happy to come directly to your clinic to see your patients. Our lab requires 4 parking spaces to fit in a parking lot. Scheduling restrictions may apply depending on the number of patients from your clinic.

Tucson and Flagstaff

We do make visits to Tucson and Flagstaff with a minimum appointment count of 2 patients.
